

DENESHKAR PUNYAMOORTHY

Full Stack Developer | React • Node.js • MongoDB • RESTful APIs

deneshkar015@gmail.com | +94 773157942 | Colombo, Sri Lanka | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated Full Stack Developer intern candidate and Software Engineering undergraduate at SLIIT (expected 2028) with proven hands-on experience building responsive web and mobile applications using ReactJS, Node.js, Express.js, and MongoDB. Skilled in developing scalable backend systems, creating RESTful APIs, and implementing JWT-based authentication in real-world projects. Comfortable working across the full stack — from intuitive frontend interfaces to robust backend services. A fast learner who thrives in collaborative, team-driven environments and is eager to contribute to Futura Solutions' innovative digital projects.

TECHNICAL SKILLS

Frontend: ReactJS, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Design, Cross-Browser Compatibility

Backend: Node.js, Express.js, Spring Boot, RESTful API Development, JWT Authentication, Role-Based Access Control

Databases: MongoDB, MySQL, Database Schema Design

Version Control: Git, GitHub — branching, pull requests, collaborative workflows

Tools & DevOps: VS Code, Postman, Docker, Cloudinary, CI/CD practices

Engineering Practices: OOP, Data Structures & Algorithms, Clean Code, Component Reusability, Agile Methodology, Code Reviews

PROJECTS

Food Order Mobile Application

2026 – Present

Tech Stack: React Native, TypeScript, Node.js, Express.js, MongoDB, Expo, React Navigation

- Architected and developed a cross-platform food ordering app for iOS and Android using React Native, with a scalable Node.js/Express.js backend and MongoDB database — delivering a complete full-stack solution.
- Designed and built RESTful APIs for order management, user flows, and product listings, applying clean architecture and modular code principles throughout.
- Implemented JWT authentication and Role-Based Access Control (RBAC) to support secure, multi-role user flows in a real-world production context.
- Integrated a payment gateway and Cloudinary for media management; built a full-featured admin dashboard for real-time order tracking, analytics, and user management.
- Optimised app performance and ensured cross-platform compatibility across devices — from UI responsiveness to backend throughput.

Photocopy Management System

2026 – Present

Tech Stack: ReactJS, JavaScript, Node.js, Express.js, MongoDB

- Built a full-stack web application with a ReactJS frontend and Node.js/Express.js backend — delivering responsive UI components for product ordering, print requests, and authentication flows.
- Developed and integrated RESTful APIs connecting frontend and backend layers, following best practices for data validation, error handling, and state management.
- Designed and implemented an admin dashboard with profit analytics, user management, and order tracking — translating complex business requirements into clean, reusable React components.
- Applied modular component architecture and Agile-inspired sprint workflows to deliver features iteratively and maintain code quality.

GrainLink — Rice Mill Management System

2026

Tech Stack: ReactJS, JavaScript, Node.js, Express.js, MongoDB

- Developed a comprehensive multi-portal web platform supporting distinct user roles — built with ReactJS on the frontend and Node.js/MongoDB on the backend.
- Created RESTful APIs for stock tracking, billing, payment processing, and profit reporting — ensuring seamless, efficient data flow between application layers.
- Collaborated across frontend and backend in a team environment, delivering high-quality UI/UX outcomes and production-ready features within project deadlines.

Library Management System

2026

Tech Stack: Spring Boot, Java, Thymeleaf, MySQL

- Built a full-featured library platform with server-rendered UI, authentication, RBAC, and automated overdue tracking — demonstrating backend proficiency with Java and relational databases.
- Designed a MySQL relational schema covering books, members, borrowing records, and fines — showcasing strong DBMS fundamentals and data modelling skills.
- Implemented scheduled background jobs and an admin dashboard with real-time notifications, reinforcing OOP and clean backend architecture practices.

EDUCATION

BSc (Hons) Information Technology — Software Engineering

2024 – 2028 (Expected)

Sri Lanka Institute of Information Technology (SLIIT), Malabe

Relevant Coursework: Data Structures & Algorithms, OOP, Database Systems, Software Engineering, Web Technologies, Mobile Application Development

CERTIFICATIONS

CERTIFICATES	Generative AI in Practice Jan 2026	Python Developer Jan 2026
	Sololearn	Sololearn
	Programming Using Java Feb 2025	Programming Using C++ Mar 2023

KEY SKILLS

PROFESSIONAL SKILL		TECHNICAL SKILL	
Problem-Solving	Critical Thinking	ReactJS / React Native	RESTful APIs / JWT
Time Management	Attention to Detail	Node.js / Express.js	Git & GitHub
		MongoDB / MySQL	Docker / Cloudinary
		Spring Boot / Java	VS Code / Postman

LANGUAGES

English (Proficient) | Tamil (Native)
