PERSONAL STATEMENT

Motivated Software Engineering undergraduate at SLIIT (expected graduation 2028) with hands-on experience in full-stack development using the MERN stack and Spring Boot. Skilled in building scalable web applications, RESTful APIs, and responsive user interfaces. Developed multiple real-world projects including a food ordering mobile app, a rice mill management platform, a photocopy shop system, and a library management system. Passionate about backend development, clean code practices, and performance optimization. Actively seeking a Software Engineering internship to contribute to impactful real-world solutions.

PROJECTS

Food Order Mobile Application

2026 – Present

Tech Stack: [React Native](#), [Node.js](#), [Express](#), [MongoDB](#), [Expo](#), [React Navigation](#)

- Built a cross-platform food ordering app for both iOS and Android using React Native with a Node.js/Express backend and MongoDB database
- Implemented JWT authentication, role-based access control, and real-time order management
- Integrated payment gateway, Cloudinary for media uploads, and a comprehensive admin dashboard

Photocopy Management System

2026 – Present

Tech Stack: [React](#), [Node.js](#), [Express](#), [MongoDB](#)

- Developed a full-stack photocopy shop management system with product ordering, print requests, and user authentication
- Created an admin dashboard for managing products, orders, users, and profit analytics

GrainLink — Rice Mill Management System

2026

Tech Stack: [React](#), [Node.js](#), [Express](#), [MongoDB](#)

- Built a comprehensive rice mill management platform with JWT authentication and role-based portals
- Implemented modules for stock tracking, order management, billing, payments, and profit reporting via REST API integration

Library Management System

2026

Tech Stack: [Spring Boot](#), [Thymeleaf](#), [MySQL](#)

- Developed a full-featured library system with authentication, role-based access, book borrowing/returns, and fine management
- Added admin dashboard with notifications and an automated scheduled overdue tracking system

TECHNICAL SKILLS

Programming: JavaScript, Python, Java, C, C++

Web Development: React, Node.js, HTML, CSS

Backend: Spring Boot, REST APIs

Mobile: React Native, Expo, React Navigation

Databases: MongoDB, MySQL

DevOps & Tools: Docker, Git, Postman, VS Code

Concepts: Data Structures & Algorithms, OOP, Clean Code

EDUCATION

BSc (Hons) Information Technology — Specializing in Software Engineering
[Sri Lanka Institute of Information Technology \(SLIIT\)](#) — [Malabe](#)

2024 – 2028 (Expected)

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Web Technologies, Mobile Application Development

CERTIFICATIONS

- Generative AI in Practice — Sololearn

Jan 2026
- Python Developer — Sololearn

Jan 2026
- Programming Using Java — Sololearn

Feb 2025
- Programming Using C++ — Sololearn

Mar 2023
